About my Work:

I mostly work digitally when it comes to my graphic design and illustration practice. My range of inspiration and influences is very wide – the old masters and eras like the renaissance, baroque, rococo, and impressionism; 1200-1900 architecture, vintage visual and object designs, video game concept art, the dark or bizarre, the futuristic and cyberpunk. My work is intricate, skilfully crafted, full of attention to detail, as proven by my portfolio. I'm versatile not only when it comes to the subject matter and outcome forms, but styles as well. I'm not one to constrain myself to one visual language. I like simplicity and elegance, the minimal, delicate and muted, as well as the bold, loud and neon.

Education:

The University of Edinburgh (2020 - 2024) - Illustration BA Hons
